Objectives

I'm a full stack development, specialized in modern technologies like react or nestJs, I'm studying information system engineering at Universidad Nacional of Costa Rica, I'm looking to applicate all my knowledges and get some new skills and knowledges that allow me to move up in the labor market.

Experience

Hogar de libros (University project)

February 2024- Jun 2025

This was a project in which I collaborated directed for the municipal public library of Nicoya, I participated in the Backend with the elaboration of API sections with its respective controller and service, In the FrontEnd I elaborate some views, responsive and modals, in this project we use the SCRUM methodology, and I was the project manager leader two times, Some technologies that were used in the project are : Git, GitHub, NestJs, React, MySQL and Docker.

Education:

Universidad Nacional, campus Chorotega.

I'm studying information system engineering at Universidad Nacional of Costa Rica, I started this career in 2022, and I expect to graduate in 2026, I have:

Diploma of informatics applications programming (Diplomado de Programación de aplicaciones infromáticas) given to my person in November 2024.

Bachelor's degree in information engineering (Bachillerato en ingeniería de información), will be given in the last level of the career.

Udemy.

In Udemy I am taking some courses for self-learning, and I have certifications from these courses:

Git and GitHub from cero to expert (**Git y GitHub desde Cero a Experto**) given to me in July 2024.

NestJs: Microservices with NestJs, AWS, professional Docker (**NestJs: Microservicios con NestJs, AWS, Docker Profesional**) given to me in July 2024.

Technical skills

FrontEnd:

- React
- Html, css y JavaScript
- TailWind

BackEnd:

- NodeJs
- NestJs

Tools:

- Git y GitHub
- Vite
- Figma (for development views)
- Docker

Languages

- Spanish (native)
- English (mid-level)

Soft Skills:

- Organized
- Quick learning
- Good communication
- Good teamwork
